## Modula WMS software suite

Modula WMS is a fully featured warehouse management software that can easily be used to manage the space and utilization of Modula Lift units, or as a standalone software tool. It can easily be interfaced with nearly any ERP system.

## Maximum payload for every tray width

Modula Lift VLM units offer a wide range of tray dimensions and load capacities. With tray sizes up to 13.4 feet (4.1 meters) wide and load capacities of up to 1,653 lbs, Lift units are able to meet nearly any application's requirements.

## Operator safety

All Modula units are equipped with physical and optical safety barriers in order to ensure a 100% safe environment to operators. Product safety is further guaranteed by the TUV-GS certification obtained for the entire product line.

## Internal or external bay, single or dual delivery

The internal bay is the ideal solution when space is at a premium.

The external bay offers the best possible ergonomic workspace for operators. It can provide further benefits when used in combination with picking aids such as cranes and mechanical manipulators to lift heavy items stored within trays.

Single delivery level is ideal when the machine will be used moderately, or when the picking time is quick.

Dual delivery is the ideal configuration for a fast-paced picking operation.
